WORK EXPERIENCE

2019-2020 Developer | Tropy | Remote, Open Source

- Build new features for Tropy's desktop application using Electron and React ecosystems.
- Adapt Tropy's plugins to the current app version and third-party formats.

2018-2019 Lead Front-End Engineer | Pellego | Remote

- Built new features, and services for our web application, from mockups to production.
- Contributed to UI/UX design discussions.
- Integrated apps with in-house and external back-end APIs.
- Created searching views, map widgets, dashboards and data visualizations to help users find real estate opportunities.

2012-2018 Senior Front-End Engineer | McKinsey & Co | Remote

- Mentored, on-site, front-end development teams.
- Developed 5 web apps using Javascript frameworks like Angular, React and Knockout used in different industries.
- Developed dozens of mobile prototype apps using Phonegap.
- Implemented test suites with Jasmine and Protractor.
- Built data dashboards using d3, Highcharts and other libraries.

2010-2012 Full Stack Developer, Madehere.com | Montréal, Québec

- Developed madehere.com, a marketplace for local products, as the only tech hire (PHP, HTML, CSS, JQuery).
- Integrated APIs like PayPal, Google Maps and Yahoo WOEIDs.

2009-2010 Full Stack Developer, Nippour | Saguenay, Québec

- Developed 30 websites using PHP, HTML, Javascript and Flash.
- Developed an in-house CMS.
- Planned and executed SEO strategy for some clients.
